

PROBLEM SOLUTION

CONTAINMENT ZONE APPLICATION

AIM:

To create a containment zone application to restrict people who enter into Containment Zone like Covid-19 ward and quarantine zone

PROBLEM STATEMENT:

Now-a-days, all of us have to move from somewhere to somewhere. In spite of work pressure we didn't consider about the containment zone. We need some third person to intimate us when we entered into unsafe zone

Project Idea:

This application is intended to provide information about containment zones in a particular region by alerting people, through continuous monitoring of an individual's location. Key benefits of the application are monitoring people's activity and alerting them of their safety movements.
